CONTENTS OF VOLUME 29 2001

Volume 29 No. 1

Tony Anderson, Christine Howe, Rebecca Soden, John Halliday & Jennifer Low: Peer interaction and the learning of critical thinking skills in further education students 1–32

Willem S. de Grave, Henk G. Schmidt & Henny P.A. Boshuizen: Effects of problem-based discussion on studying a subsequent text: A randomized trial among first year medical students 33–44

Allan G. Harrison & David F. Treagust: Conceptual change using multiple interpretive perspectives: Two case studies in secondary school chemistry 45–85

Instructions for authors 87–94

Volume 29 No. 2

Collis, Betty, Peters, Oscar & Pals, Nico: A model for predicting the educational use of information and communication technologies 95–125

Marttunen, Miika & Laurinen, Leena: Learning of argumentation skills in networked and face-to-face environments 127–153

Lajoie, Susanne P., Lavigne, Nancy C., Guerrera, Claudia & Munsie, Steven D.: Constructing knowledge in the context of BioWorld 155–186

Volume 29 No. 3

Ron Hoz, Dan Bowman & Ely Kozminsky: The differential effects of prior knowledge on learning: A study of two consecutive courses in earth sciences 187–211

Jan Schoultz, Roger Säljö & Jan Wyndhamn: Conceptual knowledge in talk and text: What does it take to understand a science question? 213–236

Peter J. Smith: Technology student learning preferences and the design of flexible learning programs 237–254

Virpi Slotte, Kirsti Lonka & Sari Lindblom-Ylänne: Study-strategy use in learning from text. Does gender make any difference? 255–272

Volume 29 Nos. 4–5

Special Issue
Epistemology, Psychology of Learning and Instructional Design

Guest Editor
Sanne Dijkstra

Preface 273–274

Sanne Dijkstra: The design space for solving instructional-design problems 275–290

M. David Merrill: Components of instruction toward a theoretical tool for instructional design 291–310

Joseph M. Scandura: Structural Learning Theory: Current status and new perspectives 311–336

Michiel Kuyper, Robert de Hoog & Ton de Jong: Modeling and supporting the authoring process of multimedia simulation based educational software: A knowledge engineering approach 337–359

Frank Achtenhagen: Criteria for the development of complex teaching-learning environments 361–380

J. Michael Spector: Philosophical implications for the design of instruction 381–402

Norbert M. Seel: Epistemology, situated cognition, and mental models: 'Like a bridge over troubled water' 403–427

Jeroen J.G. van Merriënboer & Paul A. Kirschner: Three worlds of instructional design: State of the art and future directions 429–441

Volume 29 No. 6

Carol K.K. Chan: Peer collaboration and discourse patterns in learning from incompatible information 443–479

Kristiina Kumpulainen: The nature of students' sociocognitive activity in handling and processing multimedia-based science material in a small group learning task 481–515

Instructions for Authors 517–524

Authors Index 525

Volume Contents 527–528
